INFORMATION DISCLOSURE STATEMENT

Sir:

Submitted for consideration by the Office is a copy of German patent document (Gebrauchsmuster) DE 29816131 U1, a copy of its English abstract, and a copy of an Office Action dated June 29, 2005, which was generated by the European Patent Office (EPO) for a foreign counterpart of the present application, and which cites said German patent document (Applicants request that the EPO Office Action not be cited on the face of any patent which issues from the present application).

The relevance of the cited German patent document, as presently understood by Applicants, is as follows:

SMS is thought to be described in the document as a prior solution that is limited in that the 160 characters do not permit the use of HTML. The document is currently thought to disclose the problem that web page data cannot be sent because it

is too long. The document is currently thought to propose a solution in which the control symbols in a markup language (SGML) are replaced with short forms, which are transmitted as a table to the handset in an SMS message. Also, known text ("Welcome to the World Weather Service.") can be replaced. A "start symbol" identifies the source web page, and therefore, the appropriate table to use in interpretation. Then, the table is used to translate the sent message into the full content.

Applicants do not have a translation of the cited German patent document or any portion thereof, except for the enclosed English abstract. The preceding explanation of relevance only reflects Applicants' present (incomplete) understanding of the document; that understanding was acquired from a brief reading by a German-speaking person in the law firm of Applicants' representative. Consequently, Applicants do not represent (or concede) that the cited document does in fact disclose any of the features mentioned above; Applicants reserve the right to take a contrary position if action by the Office necessitates further study and such further study indicates that Applicants' initial understanding was incorrect.

Enclosed is a copy of Information Disclosure Citation Form PTO-1449 or PTO/SB/08 together with copies of the documents cited in that report, except for copies not required to be submitted (e.g., copies of U.S. patents and U.S. published patent applications need not be enclosed). It is respectfully requested that the cited documents be considered and that the enclosed copy of Information Disclosure Citation Form PTO-1449 or PTO/SB/08 be initialed by the Examiner to indicate such consideration and a copy thereof returned to applicant(s).

Pursuant to 37 C.F.R. § 1.97, the submission of this Information Disclosure Statement is not to be construed as a representation that a search

has been made and is not to be construed as an admission that the information cited in this statement is material to patentability or constitutes prior art with respect to the present invention.

Pursuant to 37 C.F.R. § 1.97, this Information Disclosure Statement is being submitted under one of the following (as indicated by an "X" to the left of the appropriate paragraph):

X _____ 37 C.F.R. §1.97(b).

_____ 37 C.F.R. §1.97(c). If so, then enclosed with this Information Disclosure Statement is one of the following:

_____ A statement pursuant to 37 C.F.R. §1.97(e) or

_____ A check for \$180.00 for the fee under 37 C.F.R. § 1.17(p).

_____ 37 C.F.R. §1.97(d). If so, then enclosed with this Information Disclosure Statement are the following:

- (1) A statement pursuant to 37 C.F.R. §1.97(e); and
- (2) A check for \$180.00 for the fee under 37 C.F.R. §1.17(p) for submission of the Information Disclosure Statement.

If there are any additional charges, please charge Deposit Account No. 02-2666.

Respectfully submitted,

BLAKELY, SOKOLOFF, TAYLOR & ZAFMAN LLP
